PermaICE Supreme

For all skin types

- 3000W
  Super high power
- Simultaneous
  contact cooling
- Three wavelength diode laser
  (755nm+808nm+1064nm)

The PermaICE Supreme combines 3 laser wavelengths into a single innovative handpiece, simultaneously targeting different tissue depths as well as anatomical structures within the hair follicle.

By combining the absorption and penetration levels of the three different wavelengths, along with the treatment coverage, comfort and low maintenance of the diode laser, the PermaICE Supreme delivers one of the safest and most comprehensive hair removal treatments available today.

During laser hair removal, a laser emits a light that is absorbed by the pigment (melanin) in the hair. The light energy is converted to heat, which damages the tube-shaped sacs within the skin hair follicles that produce hairs. This damage inhibits or delays future hair growth.

PermaICE Supreme

For all skin types

TRIO CLUSTERED DIODE TECHNOLOGY

PermaICE offers the synergistic benefits of the 3 most effective wavelengths for hair removal, each targeting different structures within the hair follicle. The 3 main anatomical targets include the Bulge, Bulb and Papilla.

ALEX 755nm WAVELENGTH

The Alexandrite wavelength offers more powerful energy absorption by the melanin chromophore, making it ideal for the widest range of hair types and color- especially light- colored and thin hair. With more superficial penetration, the 755nm wavelength targets the Bulge of the hair follicle and is especially effective for superficially embedded hair in areas such as the eyebrows and upper lip.

SPEED 808nm WAVELENGTH

The classic wavelength in laser hair removal, the 810nm wavelength, offers deep penetration of the hair follicle with high average power, a high repetition rate and a large 15X30mm spot size for fast treatment. The 808nm has a moderate melanin absorption level making it safe for darker skin types. Its deep penetration capabilities target the Bulge and Bulb of the hair follicle while moderate tissue depth penetration makes it ideal for treating the arms, legs, cheeks and beard.

YAG 1064nm WAVELENGTH

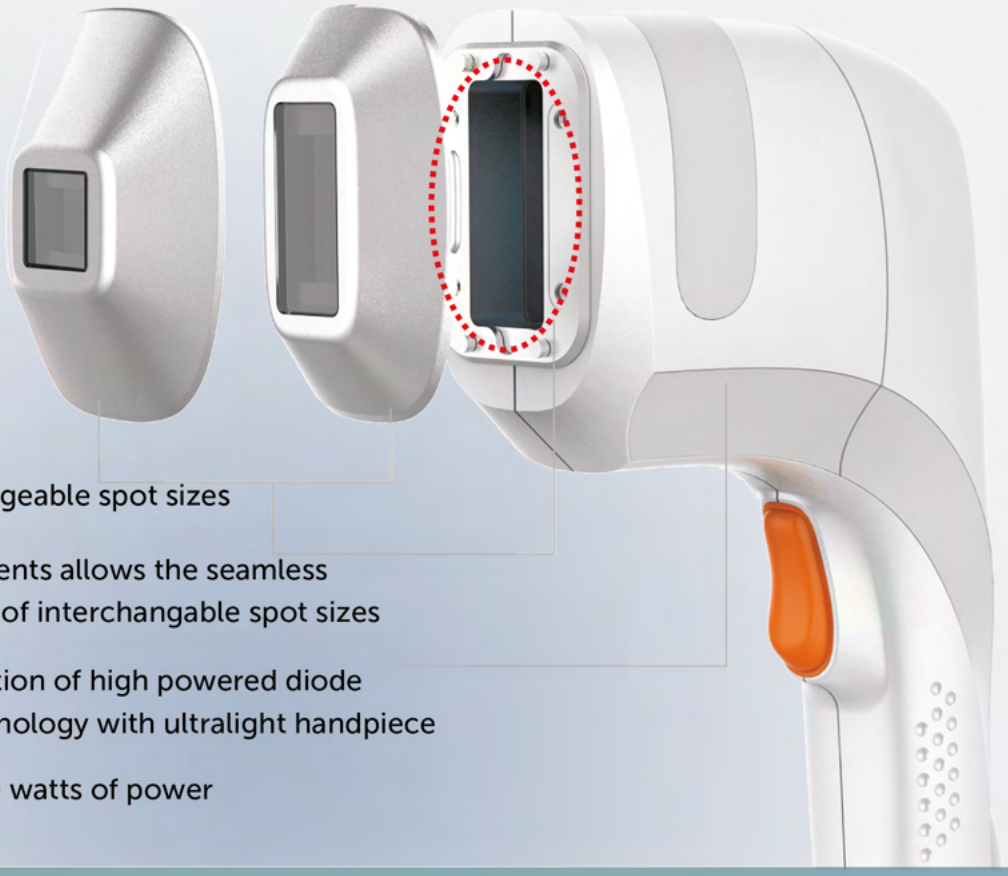
The YAG 1064 wavelength is characterized by lower melanin absorption, making it a focused solution for darker skin types. At the same time, the 1064nm offers the deepest penetration of the hair follicle, allowing it to target the Bulb and Papilla, as well as treat deeply embedded hair in areas such as the scalp, arm pits and pubic areas. With higher water absorption generating a higher temperature, the incorporation of the 1064nm wavelength increases the thermal profile of the overall laser treatment for a highly effective hair removal.

SYSTEM BENEFITS

- ☑ Clinically proven in glide and stamp technology
- ☑ CE and FDA cleared for all skin types I-VI
- ☑ Intuitive and user friendly large color touch screen
- ☑ Easy to operate
- ☑ Magnetic spot replacments allows the seamless changing and fitting of interchangeable spot sizes
- ☑ 3000 watts of power
- ☑ Minimal consumables
- ☑ Adjustable grid size
- ☑ Powerful cooling
- ☑ One handle with 3 interchangeable spot sizes
- ☑ Latest generation of high powered diode laser technology with ultralight handpiece

PermaICE Supreme

HANDLE



One handle with 3 interchangeable spot sizes

Magnetic spot replacements allows the seamless changing and fitting of interchangable spot sizes

Latest generation of high powered diode laser technology with ultralight handpiece

3000 watts of power

One handpiece with 2 easily interchangeable spotsizes

Why choose PermaICE Supreme?

PermaICE supreme is the latest triband diode laser technology achieving high levels of patient and clinic satisfaction. PermaICE Supreme is an ideal platform for super fast laser hair removal. Painfree glide mode, single shot mode and exceptional results rival any other diode laser on the market today.

PermaICE Supreme

Intelligent parameter system

The professional data system automatically adjusts parameters according to different needs, different skin colors, genders, parts, and the color, thickness and area of the hair to achieve perfect control.

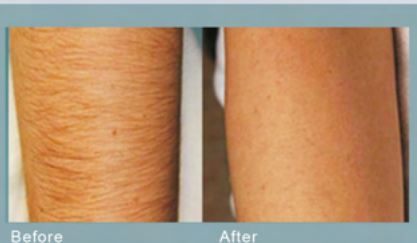
Application

Complete and effective solution for all skin tones, hair types and target areas (body & face)

Face: chin and lips, beard
Body: armpit, arms, leg hair, chest hair, bikini area

Peace of Mind

Unbeatable 3 year UK warranty,
Fully UK insured face to face training.
0% finance options available
Rental options.



With decades of experience within the beauty sector Optilight understands the issues you face and the ultimate sense you get with a satisfied customer.

Optilight is in the unique position of being able to give you complete impartial and professional advice offering sales, service & repair solutions for the world's biggest brands of medical laser and IPL machines.

We supply consumables and even offer preventative maintenance packages so you can focus entirely on serving your customers in your salon.

- ☑ Fully trained engineers
- ☑ Nationwide service
- ☑ Gold Silver & Bronze maintenance package options
- ☑ Genuine parts
- ☑ More cost effective than using the manufacturers direct
- ☑ Honest advice
