Hyper Pulse

Is available in 24 countries, with patent protection, compliant with international standards.

Exceptional Results!

Scan to watch

One system offers a diverse range of treatments

- Hair Removal
- Skin rejuvenation
- Pigmented lesions
- Vascular lesions
- Scars
- Skin tightening
- Fine lines
- Nail Fungus

ALT

Accumulative Light Torrent

Employing innovative broadband light technology, our system operates at an impressive speed of 7Hz, delivering coverage of up to 52.5 cm²/sec. The ALT is suited for various treatments, such as skin tightening, rejuvenation, toning, pigmentation, brightening, addressing problematic oily skin, hair removal, verruca removal, and cellular therapies. Additionally, the system incorporates an integrated cooling mechanism to ensure unparalleled comfort during the entire treatment session.

Key Benefits

- Quickly achieve full-body hair removal in 11 minutes
- See visible results from the first treatment
- Cover large areas rapidly
- Suitable for all skin tones
- Providing a safe, pain-free experience without side effects

Results Achieved

- Enhanced Skin and Tissue Rejuvenation
- Improved Skin Tone
- Reduction of Pores
- Significant Hair reduction

3.5cm²
For facial treatments

7.5cm²
For hair removal

BST

Body Skin Tightening

BST harnesses the power of broad-spectrum light technology, providing natural rejuvenation for skin tissue without the need for chemicals or invasive procedures. Furthermore, there is no requirement for special preparation or downtime. Utilize BST, to attain impressive results for tissue lifting and skin tightening. Addressing postnatal or post-diet skin concerns, dull complexion, uneven skin tone, as well as reducing the appearance of wrinkles and fine lines.

Key Benefits

- Fast, safe, and non-invasive treatment
- Pain-free with no side effects
- Minimal recovery time
- Broad coverage of work areas
- Financially viable

Results Achieved

- Immediate Improvement in Skin Appearance
- Significant Promotion of Collagen Synthesis, leading to improved vitality, clarity, and uniformity of skin tissue
- Enhanced Elastin Functionality and Reduced Presence of Wrinkles

7.5cm²
For body treatments

1.2cm²
For localised areas

LASER

3 wavelengths Diode

Discover the power and safety of our state-of-the-art polychromatic laser technology. Boasting an impressive therapeutic intensity of up to 80 J/cm², our device provides a comprehensive array of treatment options for swift, effective, and painless hair removal. The precision of our mechanism seamlessly integrates three distinct wavelengths, enabling targeted treatments without the necessity to replace the handheld applicator.

Key Benefits

- Six Adapters, with different spot size. For Various Areas, including the nose and ears.
- Automatic Detection System for Adapters
- Suitable for All Hair Types (except grey/white)
- Suitable for All Skin Tones
- Equipped with a Cooling System for Comfort and Enhanced Performance
- Includes Optical Software for Precise and Effective

Results Achieved

- Significant Hair Reduction
- Virtually Pain-free Treatment
- No Side Effects

RF

Radio Frequency

Tailored for all skin types, the Tri-Polar RF technology enables swift, continuous, and homogeneous heating. This non-invasive treatment method aids in firming sagging skin, reducing cellulite appearance, and stimulating collagen and elastin synthesis. The technology employs two applicators: 1) Designed for precision in smaller areas - face, neck, and periocular region. 2) Crafted for treating larger body areas.

Key Benefits

- Comprehensive Coverage of Treated Tissue
- Enhanced Thermal Effect
- Therapeutic Safety with Epidermis Preservation
- Suitable for All Skin Tones
- Visible Skin Rejuvenation Effect from
- the First Treatment

Results Achieved

- Enhanced Firmness and Reduction of Cellulite
- Body Contouring
- Firming and Tightening of Facial Features
- Renewal of Collagen and Elastin
